

Arrays

```
package Arrays;

public class DimensionalArrays {

    public static void main(String[] args) {

        //single-dimensional array
        int a[] = {15, 25, 35, 45, 55};
        for(int i=0; i<5; i++) {
            System.out.println("Elements of array a: " + a[i]);
        }

        //multidimensional array
        int[][] b = {
            {1, 4, 7, 9},
            {3, 6, 9} };

        System.out.println("\nLength of row 1: " + b[0].length);
    }
}
```
