## **Constructor types**

## 1) Default Constructor

```
package Constructor;
//constructor 1
class EmpInfo{
        int id;
        String name;
void display() {
        System.out.println(id+ " " +name);
}
public class Constructor1 {
       public static void main(String[] args) {
               EmpInfo emp=new EmpInfo();
               EmpInfo emp1=new EmpInfo();
               emp.display();
               emp1.display();
                                eclipse-workspace - Project4/src/Constructor/Constructor1.java - Eclipse IDE

## 2) Parameterized Constructor

```
package Constructor;
//parameterized
class Std{
         int id;
         String name;
         Std(int i,String n)
         id = i;
         name = n;
         void display() {
         System.out.println(id+" "+name);
}
public class Constructor2 {
         public static void main(String[] args) {
                   Std std=new Std(20, "Siri");
                   Std std1=new Std(40,"Rama");
                   std.display();
                   std1.display();
                             }
         }
